

CISO-AS-A-SERVICE

YOUR DIGITAL RESILIENCE SOLUTION

GMI's CISO-as-a-Service provides flexible, scalable solutions to help you plan, prioritize, and execute your cybersecurity strategies efficiently. Our expert CISOs provide guidance on critical information security matters, helping you build a resilient cyber posture.

Why CISO-as-a-Service?

The role of a **Chief Information Security Officer (CISO)** has never been more critical. Our **CISO-as-a-Service** gives your organization expert leadership to tackle information security challenges.

Typical Challenges:

- Managing both legacy systems and new technology threats.
- Balancing cyber-risk budgets with business demands.
- Recruiting the right technical skills and strategic leadership.

Many organizations cannot afford a full-time cybersecurity team. That's where **GMI** steps in, providing CISO expertise to manage security strategy, compliance, and risk management.

How GMI Can Help

At **GMI**, we assign an experienced CISO who will:

- ✓ Identify security gaps and offer tailored guidance.
- ✓ Assist in security program development and management.
- ✓ Provide compliance expertise and manage cyber risks.
- ✓ Our experts will work with you to develop a unique security framework that evolves with your needs.

Our Approach

- 1** Initial discussion of business context and cybersecurity requirements.
- 2** Development of CaaS options, including service packages, delivery models, and timelines.
- 3** Scope and fee agreement for the selected package.
- 4** Planning and onboarding of resources and deliverables.
- 5** Ongoing management and monitoring of cyber risks.
